Subject: RE: Remedial PFAS Update - 25 May 2021

There was resistance from the other Branches. We have been submitting written updates in advance of the mtg, so this isn't a big change for us. We keep saying it will keep the mtgs more focused and provide a better info repository for the mgrs.

Subject: FW: Remedial PFAS Update - 25 May 2021

Charlie,

Nothing changed from the below update based on our meeting today. During the PFAS meeting Cathleen and Jill did introduce a Teams page where we can keep updates for PFAS SEMD sites. It's a good idea to have all the SEMD PFAS updates in an easy to reference place so any manager can go in and see the current status of a site. I will be updating it with the remedial sites before our next PFAS meeting and during that PFAS meeting we will see if this new process will work for everybody. The hyperlink for the SEMD PFAS Flow Board is below.

Ex. 6 Personal Privacy (PP)

Thanks,
Aaron Mroz

Subject: Remedial PFAS Update - 25 May 2021

Jill,

Below is the Remedial update for tomorrow's PFAS meeting. The only changes to the update from two weeks ago are for Nonresponsive based on revised scope and Blades. I can't wait for the meeting.

Nonresponsive based on revised scope

Nonresponsive based on revised scope

Blades: Removal FSP for sampling the newly installed monitoring wells was approved and sampling occurred April 27th and 28th. After data validation, EPA will receive results. The consult with OSTRI and OEM for residential well sampling occurred on May 20th and OSTRI and OEM has given the approval to proceed. The QAPP to perform the residential well sampling is being approved. Next step for the residential well sampling will be the creation of a fact sheet to send out with the access agreements to each of the residents.

Nonresponsive based on revised scope

Nonresponsive based on revised scope
